These are typical dimensions and can be customised to suit any tray and site conditions.

Self levelling tray clearing trolley where the tray platform stays at an almost constant level. Ergonomic benefit for the restaurant customer and the catering staff – no bending or stretching to load the trolley in the dining room or to unload it in the dishwash area. Allows full utilisation of the trolley. The unit is custom made to suit the site.

**General specification** Holds two trays on each slide. Capacity of 20-24 trays. Loading and unloading level between 920 and 1300 mm. Trolley frame manufactured in stainless steel, tray slides and side panels in aluminium. Four swivel castors, two braked, in 'diamond' configuration. Four corner bumpers and two ergonomically positioned vertical push bar handles. Weight unloaded approximately 35 kg.
